## Project Experience

1. Interactive Web Application for Event Management

Developed an interactive web application for managing events using ReactJS and TypeScript. The application allows users to create, edit, and manage events with real-time updates and notifications. Implemented RESTful APIs to facilitate seamless data exchange between the frontend and backend services. Utilized Git for version control and collaborated with a team to ensure code quality and consistency. Technologies and tools used: ReactJS, TypeScript, REST APIs, Git, Bootstrap.

## 2. Responsive Portfolio Website

Created a responsive portfolio website using HTML, CSS, and VueJS to showcase personal projects and achievements. The website features a dynamic gallery and contact form, enhancing user interaction and engagement. Employed Bootstrap for responsive design and ensured cross-browser compatibility. Integrated GitHub for version control and continuous deployment, streamlining the development process. Technologies and tools used: HTML, CSS, VueJS, Bootstrap, Git.
