Project Experience

1. Interactive Web Application for Event Management

Developed an interactive web application for managing events using ReactJS and JavaScript, focusing on creating a seamless user experience. Designed the user interface with Figma and

Adobe XD, ensuring a visually appealing and intuitive layout. Implemented responsive design principles using HTML and CSS, allowing the application to be accessible across various devices. Collaborated with a team to integrate third-party APIs for real-time event updates and notifications.

2. Collaborative Design Platform

Led the design and development of a collaborative platform for designers using InVision and Sketch. The project involved creating a prototype that allowed multiple users to work on design projects simultaneously, enhancing team productivity. Utilized ReactJS to build dynamic components and JavaScript for client-side scripting, ensuring a smooth and interactive user experience. Conducted usability testing to refine the platform's features and improve user engagement.
