## Project Experience

### 1. Interactive Web Application for University Project

Developed an interactive web application as part of a university project using JavaScript, ReactJS, HTML, and CSS. The application featured a dynamic user interface that allowed users to interact

with real-time data visualizations. Implemented responsive design principles to ensure compatibility across various devices and screen sizes. Collaborated with a team to integrate RESTful APIs, enhancing the application's functionality and user engagement.

## 2. Internship Project: AngularJS Dashboard

During my internship, I contributed to the development of a comprehensive dashboard application using AngularJS, TypeScript, and Bootstrap. The project involved creating modular components and implementing data-binding techniques to display real-time analytics for business operations. Focused on enhancing the user interface with Bootstrap to ensure a clean and intuitive design. Worked closely with senior developers to optimize performance and improve user experience.

## 3. UI/UX Design for a Mobile Application

Designed the user interface and experience for a mobile application using Figma and Adobe XD as part of a capstone project. Conducted user research and usability testing to gather feedback and iteratively improve the design. Created wireframes and prototypes to visualize the app's flow and functionality, ensuring a seamless user journey. Collaborated with developers to translate design concepts into functional app features, maintaining consistency and aesthetic appeal.
